SCHEDULE OF TOOLS BELONGING TO HIGHWAY DISTRICT No. 1,  
MARCH 1, 1887.

1 sled, 1 ice crusher, 1 stone drag, 4 iron bars, 14 drills, 2 striking hammers, 1 hand hammer, 5 picks, 4 hoes, 1 plow. 1 desk, 2 lamps.

11 set fall-blocks, 1 waterpot, 2 scythes and snaths, 1 bit-stock, 2 levels, 1 shave, 1 paving hammer, 1 hatchet, 1 square, 1 chisel, 1 hand-saw, 1 coal hod, 2 oil cans, 1 harrow, 1 wheelbarrow, 1 concreet-heater, 25 tar barrels, 1 manure fork, 1 tar ladle, 15 wooden snow shovels, 13 iron shovels, 2 scoop shovels, 1 concrete roller, 2 stoves, 3 lanterns, 2 pails, 1 set pruning shears, 18 bits, 2 plains, 1 2-inch augur, 1 mallet, 1 nail hammer, 1 level, 1 pair saw-horses, 1 teakettle, 2 monkey wrench, 2 dirt-scrapers, 6 snow plows, 1 concrete kettle, 1 tape line, 1 tool box, 4 plow points, 2 sewer grates, 7 chains, 1 dung puller.

C. B. S. WATSON, Surveyor.

# PUBLIC LIBRARY.

TO THE SELECTMEN OF LACONIA:

In presenting this, the ninth annual report of the condition of the Laconia Public Library, your trustees desire to call your attention to the following table as showing from its beginning the constant usefulness and growth of the Library, which must remove any doubts that may have existed, as regards its benefit to all, and worthy of being liberally sustained. Its present quarters are very much crowded, and if its usefulness and increase is to be continued, larger and better accommodations must be provided in the near future. The usual congressional publications have been received, also a volume from the Rev. James Freeman Clark.

THE FOLLOWING TABLE SHOWS THE GROWTH OF THE LIBRARY:

	1879	1880	1881	1882	1883	1884	1885	1886	1887

# SCHOOL REPORT.

## GRADED SCHOOLS.

---

TO THE LEGAL VOTERS OF SCHOOL DIST., NO. 1:

In a rather uneventful year, without any striking or notable incidents, there are some features of our school history which the Board of Education believe will prove interesting and worthy of notice.

Perhaps the most prominent event is the erection of the new school building in Academy Square, which it is expected will be completed in season for use during the coming fall. The readiness and alacrity even with which the very large appropriations for this purpose were voted was a source of peculiar satisfaction to the board. It proved that our people would favor no narrow nor niggardly policy in the management of our schools, but would give a cordial support to those who "devise liberal things."

When completed the board believes the new building will be among the very best of its class in the state, and furnish ample accommodation for both our High and Grammar schools for many years to come.

The new building will make necessary changes which are likely to mark a new era in our schools. The high and grammar schools will be brought together into the same building. This will involve the permanent employment of a male principal, competent to organize and maintain a stricter discipline than has always obtained in the past. Special precautions must be taken to prevent those injuries and vandalisms which young America seems to regard as the natural and inevitable fate of school buildings. More stringent rules must be adopted for the government of scholars in and about the building, and most certain and summary punishment must follow any infraction of these rules. The Grammar schools must be regraded so that all the scholars of the same year may come under the instruction of the same teacher.

In making and enforcing these regulations the Board of Education has the right to ask and expect the cordial support of parents and taxpayers. And here the board ventures to suggest that their duties would be greatly lightened and the success of our schools greatly promoted if parents would show a warmer interest in our schools by visit-

ing them oftener. Very few of our citizens ever step their feet inside our school-rooms. The result is that opinions of teachers and of school regulations are very largely formed from the reports of pupils. How unreliable these reports often are, and what erroneous impressions are got in this way can best be told by those having experience in such matters. Much unfair criticism of teachers would be avoided if parents but knew the conditions under which their work is done and the necessity for regulations, which are often thought needless and foolish, would be more generally acknowledged. Frequent visits to our school-rooms would not only be an encouragement to teachers but would have a most wholesome effect on the scholars.

In connection with this it ought to be stated that some parents do much to detract from the interest and value of our schools by not insisting on a more prompt and constant attendance. Children are often allowed to remain out of school for the most frivolous reasons, thus hindering the progress of their classes when they return, making additional work for the teacher and distracting their attention from their studies. It is noticeable that these absences are most frequent among the poorest scholars. Pupils who idle away their time in the school-room are precisely the ones most ready to catch at any excuse for keeping out altogether. Usually there is no better sign of poor scholarship than to find children eager to give up their school work. Parents should be slow in granting leaves of absence, and should even submit to inconvenience rather than allow their children to remain out of school.

During the past year the Board has advanced the pay of teachers in the primary and intermediate grades, making it equal to that in the grammar schools. They have done this because they are convinced that some of the most important and most laborious work is done in these schools. Without good primary schools the whole system must be defective. The board have therefore given special attention to these schools, and are greatly pleased with the good work now being done in them. Even with the advanced pay, the annual salary of primary teachers, owing to the shorter terms, is less than the same teachers could earn in schools of a higher grade. The Board regard the change in pay as a matter of simple justice to the teachers of the lower grades, and believe that if any discrimination is to be hereafter made it should be in their favor rather than against them.

An additional reason for giving special attention to the lower grades is found in the fact that quite a good many fall out after reaching the Grammar grade. It is therefore doubly necessary that the training which they receive, during the few years they are in our schools, should be the best at our command.

The most rapid increase of scholars is noticed in the lower grades and an additional primary school on the North side, cannot be long

postponed. The room now occupied by the Grammar school can be utilized for this purpose. This will give three primary schools on each side of the river, and bring about a much better grading than is possible at present. Theoretically two courses of three years each ought to be equal to three courses of two years each, but practically the result has been found to be quite different.

We shall attempt no comment on the work of particular teachers. All are not equally deserving and perhaps none are entirely above criticism, but the Board believe that taken as a whole the work of our schools shows an advance on that of former years. That but few changes of teachers has been made is a clear indication that most of them have won the right to remain by satisfactory services in the past.

It is evident, however, that our schools will never be what will satisfy as public-spirited and enterprising a village as Laconia until the entire system is brought under a more careful and thorough supervision. The Board are, more and more, conscious of their own shortcomings in this direction, and are more and more convinced that the personal supervision of the schools should at an early day be given to one person, at a salary sufficiently large to enable him to devote to the work at least one-half of each school-day. How this result can best be reached is a problem whose solution the Board is now considering,

The whole number of children of school age, returned by the selectmen last April was, boys 315, girls 316, which is but a trifling advance on the return for the preceeding year.

The statistical table, giving a statement of the work of the year, is annexed.

# SCHOOL REPORT.

FOR UNGRADED SCHOOLS TOWN OF LACONIA.

---

In presenting this, the first annual report under the law abolishing the District system, your Board labor under some slight disadvantage. This being the first year of the operation of the new law, makes the duties devolving upon your Board more arduous than they will be in the future.

We would, at this time, mention the great and irreparable loss to the town and to the remaining members of the Board, in the death of Chas. R. Swain, Esq., in June. Himself a most successful teacher, and an earnest worker in the cause of education, his death made a void in your Board, that without disparaging the ability of many citizens eligible to the office, the remaining members were loath to fill, and decided to wait until the annual election and let the legal voters indicate their preference. We would not close this part of our report without bearing testimony of our respect to his memory as a faithful official, and a Christian gentleman.

We feel that a good work has been done in all the schools under our care. The utmost care was taken to secure efficient teachers, and we can but feel that we were successful; and this is our reason for retaining the services of nearly all the teachers who commenced the school year under our charge. We would at this time most earnestly urge upon parents, and all kind friends of education, to visit our schools more frequently. Such visits are productive of good in more ways than one. It is an incentive to both teacher and pupil to greater effort; it encourages both to feel that an interest is felt in their progress.

Your Board have not deemed it best to discontinue any of the three schools. But in the near future it may be deemed wise to pay the money to two teachers rather than three, thereby prolonging the time which every scholar can attend school. The school-house at The Weirs was found in such a dilapidated condition that it was found necessary to expend quite a large sum relatively upon repairs, to make it even decent. At best it cannot meet the requirements of this growing community, but a short time. We would most urgently ask for a larger appropriation, that many needed reforms may be successfully inaugurated.

With this report will close the connection of one member of the Board who most reluctantly consented to stand as a candidate for an office, the duties of which he felt himself unable to perform in a satisfactory manner. And thanking those who have stayed up his hand, and been so lenient in their judgment of his acts, he most gladly resigns to make way for one better qualified to perform the duties that pertain to the position in a more acceptable manner. But wherever placed he hopes never to lose his interest in the noble work of education.

#### SCHOOL RECENTLY KNOWN AS DISTRICT No. 3.

Miss Idella M. Drew of Gilmanton taught both spring and fall term. There was no winter term. In Miss Drew is combined the many qualities that make a successful teacher. She possesses that firmness united with kindness that is so requisite in the management of the many different dispositions found in the average school. And it is safe to say that good progress was made by the pupils under her charge, especially in that much neglected study—reading.

Number of visitor during the year, 42. Roll of honor: Spring term—Ida Willey, Nellie Drown, Angie Eastman, Eleanore Robinson, Grace Kimball, Pearl Sanborn, Frank Willey. Fall term—Ida Willey, Pearl Sanborn, Fred Huston.

#### SCHOOL AT THE WEIRS.

Spring and summer terms were taught by Miss Fannie M. Spencer of Plymouth. Miss Spencer came highly recommended by the faculty of the State Normal School, and the late Supt. of Schools at Plymouth, and fully deserves the high praise spoken of in her behalf. Number of visitors, 24. Roll of Honor: Spring term—Sadie Huntress, Alice Marsh, Nellie Marsh, Gertie Pickering, Fred Moore. Summer term—Alice Pickering, Fred Moore.

Winter term taught by Miss Myrtie E. Glidden of Meredith. Of Miss Glidden it can truly be said, without flattery, that she is a born teacher. Believing that "Order is Heaven's first law," she acts upon that belief, and it is saying nothing derogatory of any teacher to say that, in this respect, Miss Glidden ranks A 1. She also possesses that power to win the respect of all her pupils, and also to impart instruction in a way that interests while it instructs the pupil. We trust she may long continue to teach where she has now the regard of all. No. of visitors, 26. Roll of Honor: Nellie Marsh, Gertrude Pickering, Alice Pickering, Frank Marsh.

#### SCHOOL AT THE UNION SCHOOL HOUSE.

All three terms were taught by Miss Ellen W. Robinson of Laconia. Miss Robinson is a hard-working, conscientious teacher and de-

servedly successful. It is a difficult matter to maintain an interest where a school numbers less than eight or ten pupils, and such schools require different management than others. Miss Robinson, fully conscious of the fact, adapts herself most successfully to such a condition. No. of visitors during the year, 44. Roll of Honor: Spring term—Wilhe Filgate, Homer McCartney, Leroy Trojano, Antony Trojano. Summer term—Willis Watson, Noah Brown, Lillian Brown. Fall term—Fred Barnes, Willis Watson.

J. S. DOOLITTLE,  
JACOB SANBORN.
